"IF YOU HAVE BREAD,
YOU HAVE EVERYTHING."

Crunchy crust, soft crumbs, mixed with
flavourful seeds and spices. Our breads
and baked goods are made of quality
ingredients and authentic sourdough
but do not contain any additives or
preservatives.

Our automated bakery opened in 2015 in
Dunaszerdahely in Slovakia. The objective
of our unique bakery is to bring back the
flavours and aromas of the sourdough
bread to our customers. To achieve this,
we combine traditional recipes with
modern technologies.

HOW ARE OUR BAKERY PRODUCTS MADE?

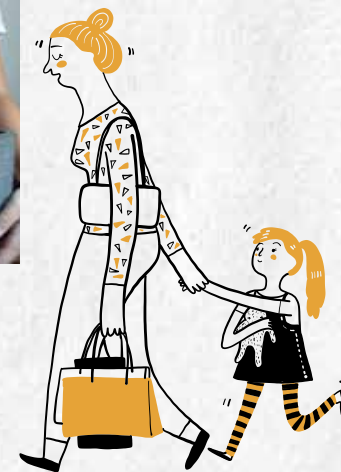

Our baked goods are made with traditional, long-fermented sourdough and we use both time-honoured and modern recipes. We also introduce international flavours: Italian ideas and French delicacies can be found in our product range.

All our products are ready-baked in our bakery. We do not use any preservatives in our baked goods – their freshness is ensured by, on the one hand, the sourdough itself, and, on the other hand, the deep-freezing process. Our breads are delivered deep-frozen to the shops where, after defrosting, they are re-baked in a hot oven, then the fragrant, fresh, baked goods are put on the shelf.

The self-made sourdough and the natural leavening process make our breads exceptional, while the top-quality flour from Slovakia and Hungary is responsible for the excellent fragrance, the crunchy texture and the long-lasting freshness.

SOURDOUGH – THE KEY TO THE PERFECT BREAD

Did you know that the leavening process was discovered by the Egyptians when they accidentally left the dough out on a sunny day for a long time?

Sourdough is a mixture of flour and water, the thin, porridge-like paste is left to rest for 2-3 days. During this time, bacteria and yeast fungi naturally start the leavening process.

The making of a sourdough bread requires time and perseverance since it could take up to 75 hours from mixing the starter to baking the product.

Natural sourdough can contain more than 40 types of bacteria with a beneficial health effect. It helps to maintain the balance of the gut microflora, it does not acidify the body, thus its consumption does not lead to bloating.

Due to the long-fermented sourdough, some nutrients break up into simpler molecules, which our body can process and use more efficiently. This sourdough helps digestion as the gluten content of the flour is broken down into amino acids, and the human body can process such substances more efficiently.

!?! WE WOULD LIKE TO BRING CLOSER TO YOU THE TRADITION OF SOURDOUGH
AND BREAD MAKING WITH OUR PRODUCT RANGE.

SQUARES AND PAINS

Our squares and pains with our self-made, long-fermented sourdough are available in several flavours. They can be the perfect choice for a quick sandwich or for a burger at a grill party.

PASTRIES

Did you know that, according to the legend, puff pastry was discovered by accident in France, around 1645?

There's no accident, however, in our puff pastries: we consciously combine historical traditions with modern technologies in our recipes. The making of the puff pastry is an art form in itself. Butter is folded and rolled into the dough in several steps,

thus the dough opens up into beautiful thin layers during the baking process. Our additional ingredients elevate the satisfying crunch of the puff pastry into new heights.

We offer unfilled pastries as well as baked goods with delicious fillings or unusual shapes. The rich flavours are guaranteed by the local and European fruits, and such

enticing ingredients as the cinnamon, the eggnog, the pistachio, the walnut or the vanilla. The pastry achieves its well-known layered form in the oven, where the water content of the butter heats up during the baking process, and the steam pushes the layers apart. That's how our dough becomes a nice, fluffy and tasty delicacy.

Don't miss out on them!

MINIS

Bite-sized sweet happiness for your coffee or tea – you can't resist the temptation...
Available in more than 20 flavours and shapes. Which one will be your favourite?
